

YOUNG FINAL FINISH, LLC - AUTHORIZED SERVICE PROVIDER OF

ADSIL MICROGUARD

PROJECT: KROGER SUPERMARKET

CLEANED / RESTORED / PROTECTED

Kroger is a national Supermarket chain in the United States. Red brick quarry tile is installed in the entrance of some of their Supermarkets. They soon found out what many others who have tile and grout installed know, it's extremely

difficult to keep clean. This project required deep cleaning and color sealing of grout lines. Once this was complete the floor was ready to be protected by Microguard. As shown above the results were amazing! The floor looked great and because of

Microguard the COF is improved and Kroger is left with a floor that not only looks good but is easy to maintain and will be for years to come.
